ABOUT THE LONDON COLLEGE OF ARTS MALTA

Founded with a vision to provide world-class design education, we offer a range of programs designed to equip students with the skills and knowledge needed to excel in today's dynamic global market.

All our qualifications, ranging from the level 5 undergraduate diplomas to the Bachelor's degrees, are European-accredited and recognised worldwide for immigration and higher education. We follow the guidelines set by our regulator, the Malta Further & Higher Education Authority (MFHEA). Our courses are aligned with the Malta Qualifications Framework and the European Qualifications Framework.

LCA offers a wide range of design degrees in Fashion and Interior Design, combining creativity with the growing digital world. Accredited by MFHEA, our programs attract students from across the globe. With live online lectures and expert mentorship, our European-accredited qualifications are accessible and industry-relevant.

Rooted in European heritage, we offer accredited programs in top design destinations. Our industry-driven courses prepare students for real-world success, shaping skilled and responsible professionals with a focus on sustainability.

OUR MISSION:

Empowering individuals with design education that fosters leadership, strategic thinking, and practical skills in an inclusive environment for career success.

OUR VISION:

To be a leading institution recognized for excellence in design education, known for producing impactful leaders who drive innovation and success in their fields.

PROGRAM DESCRIPTION

The Undergraduate Higher Diploma in Interior Design program equips learners with the skills to design and produce functional and comfortable spaces. This includes comprehending client requirements and incorporating them into the project, as well as considering industry standards and market conditions to create usable spaces. Interior designers are creative leaders who uplift society with their analytical thinking and problem-solving abilities, not just in choosing furniture but also in creating better experiences in any place. When designing a space, designers consider the intended user and the area's functioning while selecting the appropriate materials and styles to complement each other. This program explains the importance of designers in society by starting with fundamental design principles and going through the evolution of styles and design, space planning, followed by a creative portfolio to showcase their works.

Credits : 90 ECTS
